capillary pressure against relatively as low as 1 mm Hg. The minimum of the pressure is at the capillary exit. The general view of the 3 L. formosa is represented schematically in Fig. 1. The capillary pressure is affected by the capillary radius, the length of the capillary, the viscosity of the fluid, and the flow rate. The capillary pressure is also affected by the capillary diameter, the length of the capillary, the viscosity of the fluid, and the flow rate. THEY CAN ALL SPEAK HEBREW

the word "bureau" is one of the most commonly used and poorest misnomers. It is a misnomer in connection with the "Bureau of the City" which is devoted to the work of the city, and the word "bureau" is not used in the same sense as the word "bureau" is used in the general sense of the word.
